Network Administrator (m/f)

Ypsilon.NET AG (Frankfurt a.M.)

Job Description

We are looking for a self dependent, flexible, resilient Network Administrator who will be a key member of the IT Team in Frankfurt a.M and report to the Director of IT. It is a hands-on technical position focusing on the support and maintenance of the network infrastructure, server hardware/software setup and maintenance.

We offer long term employment with flexible working hours and can also provide access to exclusive touristic offers only available for travel business employees.

Police clearance certificate will be required as part of the infrastructure is considered high security.

Requirements

- You are experienced in the Linux network/server administration field in general, good knowledge of Debian system is a plus
- You possess good knowledge and experience of firewalls (iptables/pf/Juniper/Fortigate), VPN (OpenVPN/IPSec) and network layer 2/3 with HP/Juniper
- You are comfortable with at least one configuration management system (Ansible, etc)
- You can handle VMware (vCenter/ESXi)
- Experience in setup/maintenance of DNS (bind), LDAP(openldap), Webservers(Apache, Nginx), Databases (Postgresql, MySQL), mailserver (postfix), POP3/IMAP Servers (dovecot) is a plus
- Knowledge of a scripting language (python, perl, sh, python preferred) for automation/customization would be an asset
- Experience maintaining a CA hierarchy (openssl) is an advantage
- You should be able to communicate in English and German
